

We have been a customer of Wi-Fi Guys since 2012, when we added a WAN aggregator to load balance the bandwidth between an existing T-1 line and a newly installed cable line at our main office branch. Adam Osterlund was instrumental in understanding what we needed, configuring the equipment and walking us through the installation with minimal downtime or effort on our part. Last year we dropped our T-1's to our main office and 2 branches in place of cable lines, and use Wi-Fi Guys to manage the WAN aggregators. Thanks to Adam, the switch was seamless and our downtime was less than 10 minutes per office. Since the beginning, Wi-Fi Guys has given us excellent and timely support for any issues or questions that have come up. From billing to service and support, I would recommend Wi-Fi Guys to any business.
