

We recently upgraded from a T-1 to an AT&T fiber circuit and implemented a Wan Aggregator from Wi-Fi Guys to load balance and provide failover to Cox Cable. Wi-Fi Guys was easy to work with. We had issues with our LAN provider and Wi-Fi Guys engineers worked with the provider to developed a successful solution to implement their service.

We now have much better speed throughout the dealership, including a remote location, and can prioritize traffic to Chrysler sites for ordering parts and cars.

Wi-Fi Guys has done a great job for us and you should expect similar success with them. I highly recommend their services.

A handwritten signature in blue ink, appearing to be "Ray Slade", with a long horizontal line extending to the right.
